

Today people are even more attracted and interested in this new light technology, by LED spots as the main sources of illumination, and they wish to try them over their own aquariums, even close to an already existing illumination.

After having studied deeply this new wish of final customers, we have produced this new pendant by a strong and innovative impact, with a great quality/price ratio, and especially completely Made in Italy.

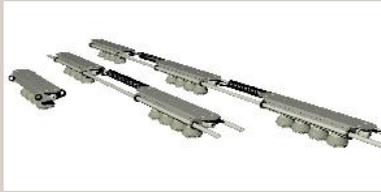

Sfiligoï company is proud to present you the new born SIRUS!

Akline Pty Ltd
 16-18 Freight Road TULLAMARINE VIC 3043

 e-mail: aquariums@akline.com.au

SIRUS is a unique product, because it is:

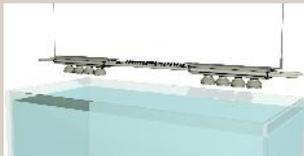

1) FLEXIBLE

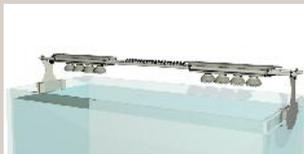

The dimensions can be customised to be suitable for each kind of aquarium, of any dimension, with one, two, three or more modules.

2) VERSATILE

It can be used:

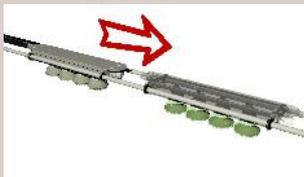

- hung down from the ceiling;
- supported at the tank, using the special brackets;

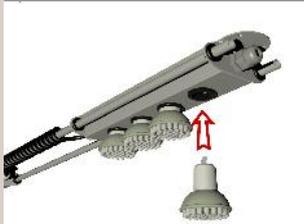

- inside terraced exhibit aquariums, attached at the glass of the tank above.

3) IT CAN BE PERSONALIZED

It is possible to customise the position of the light because it is provided with sliding modules, that can be positioned at will.

4) PRACTICAL

It is possible to replace even an only LED at a time, without having to dismantle the complete pendant.

5) ADAPTABLE

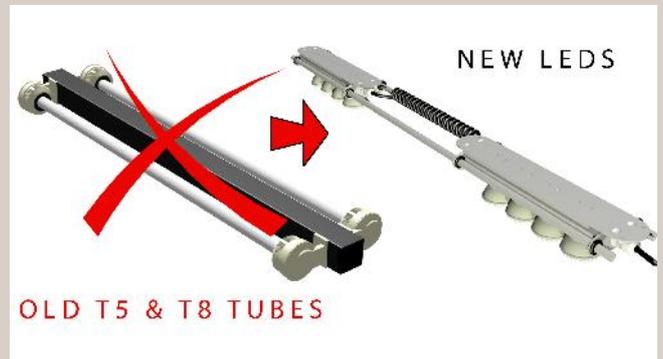

It is possible to have different solutions of illumination in a single pendant.

There are many possibilities of colours (Warm White, Cold White, Blue, Red, Green) and many power wattages available (1.3W, 2.2W, 3W)

HIGH PERFORMANCES LED LENSES

Leds are provided with special lenses that allow the concentration of the light, doubling the light power emitted and reducing the energy consumption.

SIRUS represents the most suitable solution for those people who wish a LED pendant over their own aquariums; they can change, in this way, the old T8 and T5 pendants.

SIRUS allows the customer to have all the benefits and advantages of the LED illumination:

- save energy;
- longer life of the light (up to 100.000 hours)
- different light intensities.

SIRUS represents the ideal illumination for all those aquatic environments that don't need too much light, but without renouncing to the special effect of ripple that "point" sources, as Leds, can reproduce in the water.

Model	Dimensions	Power
30 cm - 1 Module	30 x 9 x 6,5cm	4 Leds x 1,3W/ 2,2W
90 cm - 2 Modules (4 leds each module)	90 x 9 x 6,5 cm	8 Leds x 1,3W/ 2,2W
120 cm - 2 Modules (4 leds each module)	120 x 9 x 6,5 cm	8 Leds x 1,3W/ 2,2W
120 cm - 3 Modules (4 leds each module)	120 x 9 x 6,5 cm	12 Leds x 1,3W / 2,2W
150 cm - 3 Modules (4 leds each module)	150 x 9 x 6,5 cm.	12 Leds x 1,3W / 2,2W
150 cm - 4 Modules (4 leds each module)	150 x 9 x 6,5 cm.	16 Leds x 1,3W / 2,2W

(the measures listed here above, are the standard one, suggested by Sfiligoi company.

In any case, it is possible to receive the SIRUS pendant in the most likely lengths and with as many modules as preferred).

SIRUS can be personalized in any way, in order to satisfy any need of illumination.
