

S T E A L T H

Stealth is the Sfiligoi pendant that brings the concept of aquarium lightings at a new level, where innovation, technology and design reach the perfection. Its light expresses a new balance between power and light itself, and, referring to all the other pendants that are already present in the market, allows to reach a wonderful result, of high supremacy.

The extraordinary characteristic of this pendant, depends on its ability to optimise the t5 tubes' lighting functions, in order to obtain wonderful results and unique emotions, especially thanks to the hqi version.

It is not easy to describe the feelings that this pendant can ensure you!

We wish you to try them!

T5's and HQI

Stealth is the only pendant available for aquariums, that has both 8 T5 tubes and 2 HQI Metal Halides, 70w, 150w,250w.

The combination of T5 tubes and HQI, ensures the highest performances in terms of lighting, which are absolutely without comparisons.

HIGH PERFORMANCES REFLECTORS AND PERFECT UNIFORMITY

Each T5 tube has its own reflector, all made in aluminium, especially studied in order to optimise all the power of the fluorescent T5 tubes' light.

A very innovative point is the "reflector for the HQI", that has been studied by our own experts: thanks to the perfect balance beyond its shape and its dimensions, it is possible to obtain the maximum power in light.

"COOLING-SYSTEM"

Stealth's extraordinary performances are enhanced in the version provided with Cooling System. These models have adjustable speed fans, that change referring to the internal temperature.

This special characteristic allows a great environmental comfort to be recreated inside the tank: in fact the temperature of each tube is kept constant, and its emission of colour's temperature is always the same for all its life long. In the Cooling System is included the tempered protective glass, that protects the tubes and the reflectors from the water, and let them be always brilliant, as in origin.

SIMPLE MAINTENANCE

Maintenance is simplified with the new Stealth pendant design: the power source is easily accessible, as all the other wirings.

The tubes are accessible by simply sliding the protective glass out of the way.

HANGING ON and ON THE AQUARIUM

Stealth can be easily hung from the ceiling or other proper mounting areas, both vertically and horizontally,

or added at the aquarium using the special brackets.

STRONG AND LIGHTWEIGHT

Stealth is realized in extruded aluminium, to grant the maximum strength.

Also all the other parts of the pendant are made in aluminium in order to have a strong and lightweight pendant.

WITH MOON LEDS (on request)

On the models with only the T5 tubes, it is possible to add, in the middle of the pendant, a row of blue leds, that will recreate the moon phases in the aquarium.

ITS AESTHETIC WILL LEAVE YOU BREATHLESS!

Its shape soft and elegant, the extremely slim profile and the technical aesthetic

properties, let Stealth be a pendant by wonderful and exiting design.

ELECTRONIC LOCAL POWER SOURCE

Stealth was built around a local electronic power source, completely Made in Europe, that is used to heat the tubes gradually when switching them on, in order to allow the tubes to last longer.

Model	Dimension	Power
Mini STEALTH 4 X 24/39/54 /80W	61/91/121/151 x 26 x 7,5 cm	4 X 24/39/54 /80W
MiniSTEALTH 6 X 24/39/54 /80W	61/91/121/151 x 26 x 7,5 cm	4 X 24/39/54 /80W
STEALTH 8 X 39/54/80 W	91/121/151x 50 x 7,5 cm	8x39/54/80 W
STEALTH 12 X 39/54/80 W	91/121/151 x 50 x 7,5 cm	12x39/54/80 W
STEALTH 8 X 39 W + 2 x 70/150 W	91 x 50 x 7,5cm	8x39W+2x70/150W
STEALTH 8 X 54 W + 2 x 150/250 W	121 x 50 x 7,5cm	8x54W+2x150/250W
STEALTH 8 X 80 W + 3 x 150/250 W	151 x 50 x 7,5cm	8x80W+3x150/250W
