

Submersible Halogen Pond Lights

Tornado Lights, the NEW Pond Light range, represents the easy way for your pond lighting. Very robust and economical, this new light is available in three models – 20w, 35w, 50w Halogen. These sets include a clear glass lens, set of four dichroic colour glass lenses and a 10 metre cable. These lights have the integrated plugging system, which is now available on low voltage pumps and other items. This allows an interchangeable system, where you can use the single transformer for multiple items.

Submersible LED Pond Lights

Using the same casing the NEW LED pond lights are available. This new light is available in five models – 40 LEDs in white, red, blue, green and a 60 LED colour change unit. These sets share a lot of the features of their halogen cousins but with extremely lower power consumption.
